

Welcome

to the

Fairfield Rd. & Monaville Rd.

Intersection Improvement

Stakeholder Involvement Group

Meeting #1

What is the purpose of this meeting?

- The goal of the Stakeholder Involvement Group (SIG) is to provide input to Lake County regarding the development of a design solution for the Fairfield Road at Monaville Road Intersection.
- Your input is essential for the development of a successful project. Please share your comments and opinions.
- We will use your input, along with sound engineering to develop alternatives to improve the intersection.

SIG Member Responsibilities

- Attend meetings and participate in discussions and activities.
- Disseminate information to others.
- Participate openly and honestly, while respecting the opinions of group members.
- Work collaboratively to seek a consensus solution.

Public Information Meeting Summary

Public Information Meeting #1 was held on Tuesday, June 7, 2016.

Purpose of the meeting:

- Introduce the project to the public
 - Present project schedule
 - Receive public input and comments
-

85 people signed in

27 written comments were received. Common topics:

- Generally favor the installation of a roundabout over a traffic signal
- Concerned that the traffic data collected is skewed due to the Grand Avenue closure
- Concerned about potential impacts to adjacent or nearby properties
- Address cut-through traffic on Old Monaville

Overview of Project Process

Phase I

Collect data
Gather public input
Develop design alternatives
Evaluate alternatives to identify a preferred design
State/Federal approvals

*Typically
2 years*

Phase II

Finalize design
Develop plans and contract documents
Property Acquisition

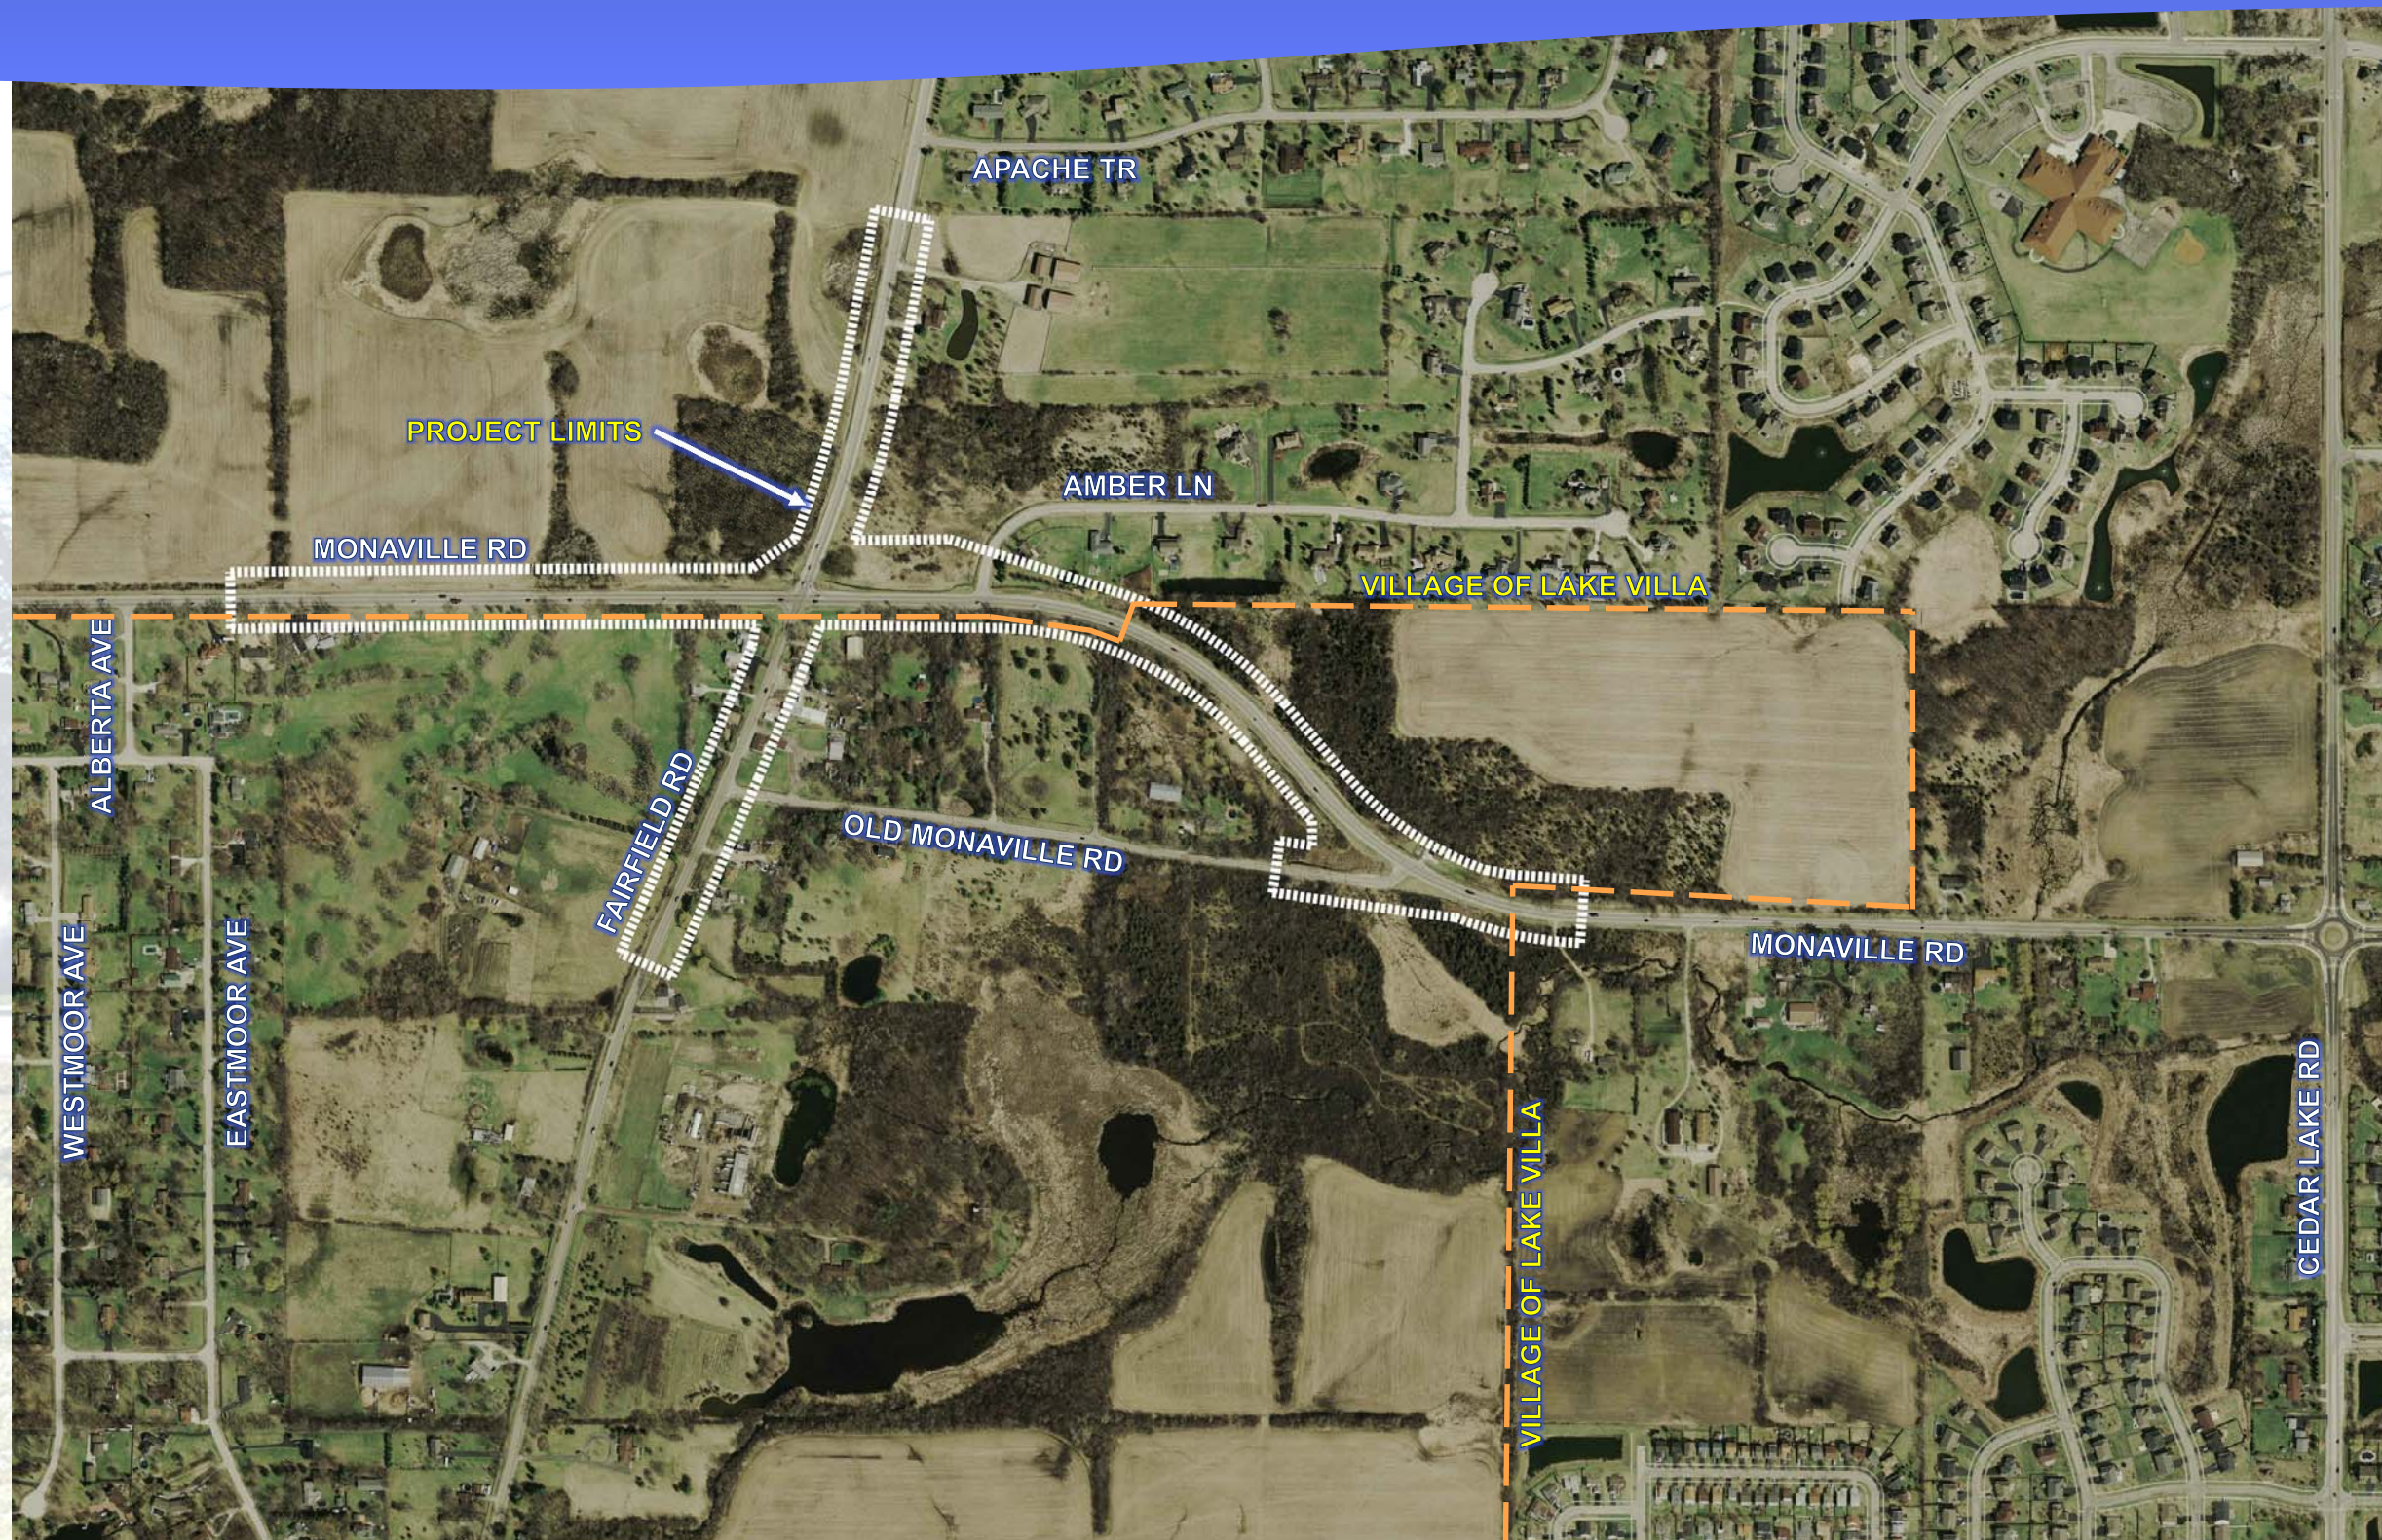

*Typically
2 years*

Phase III

Construction

*Typically
2 years*

Project Limits

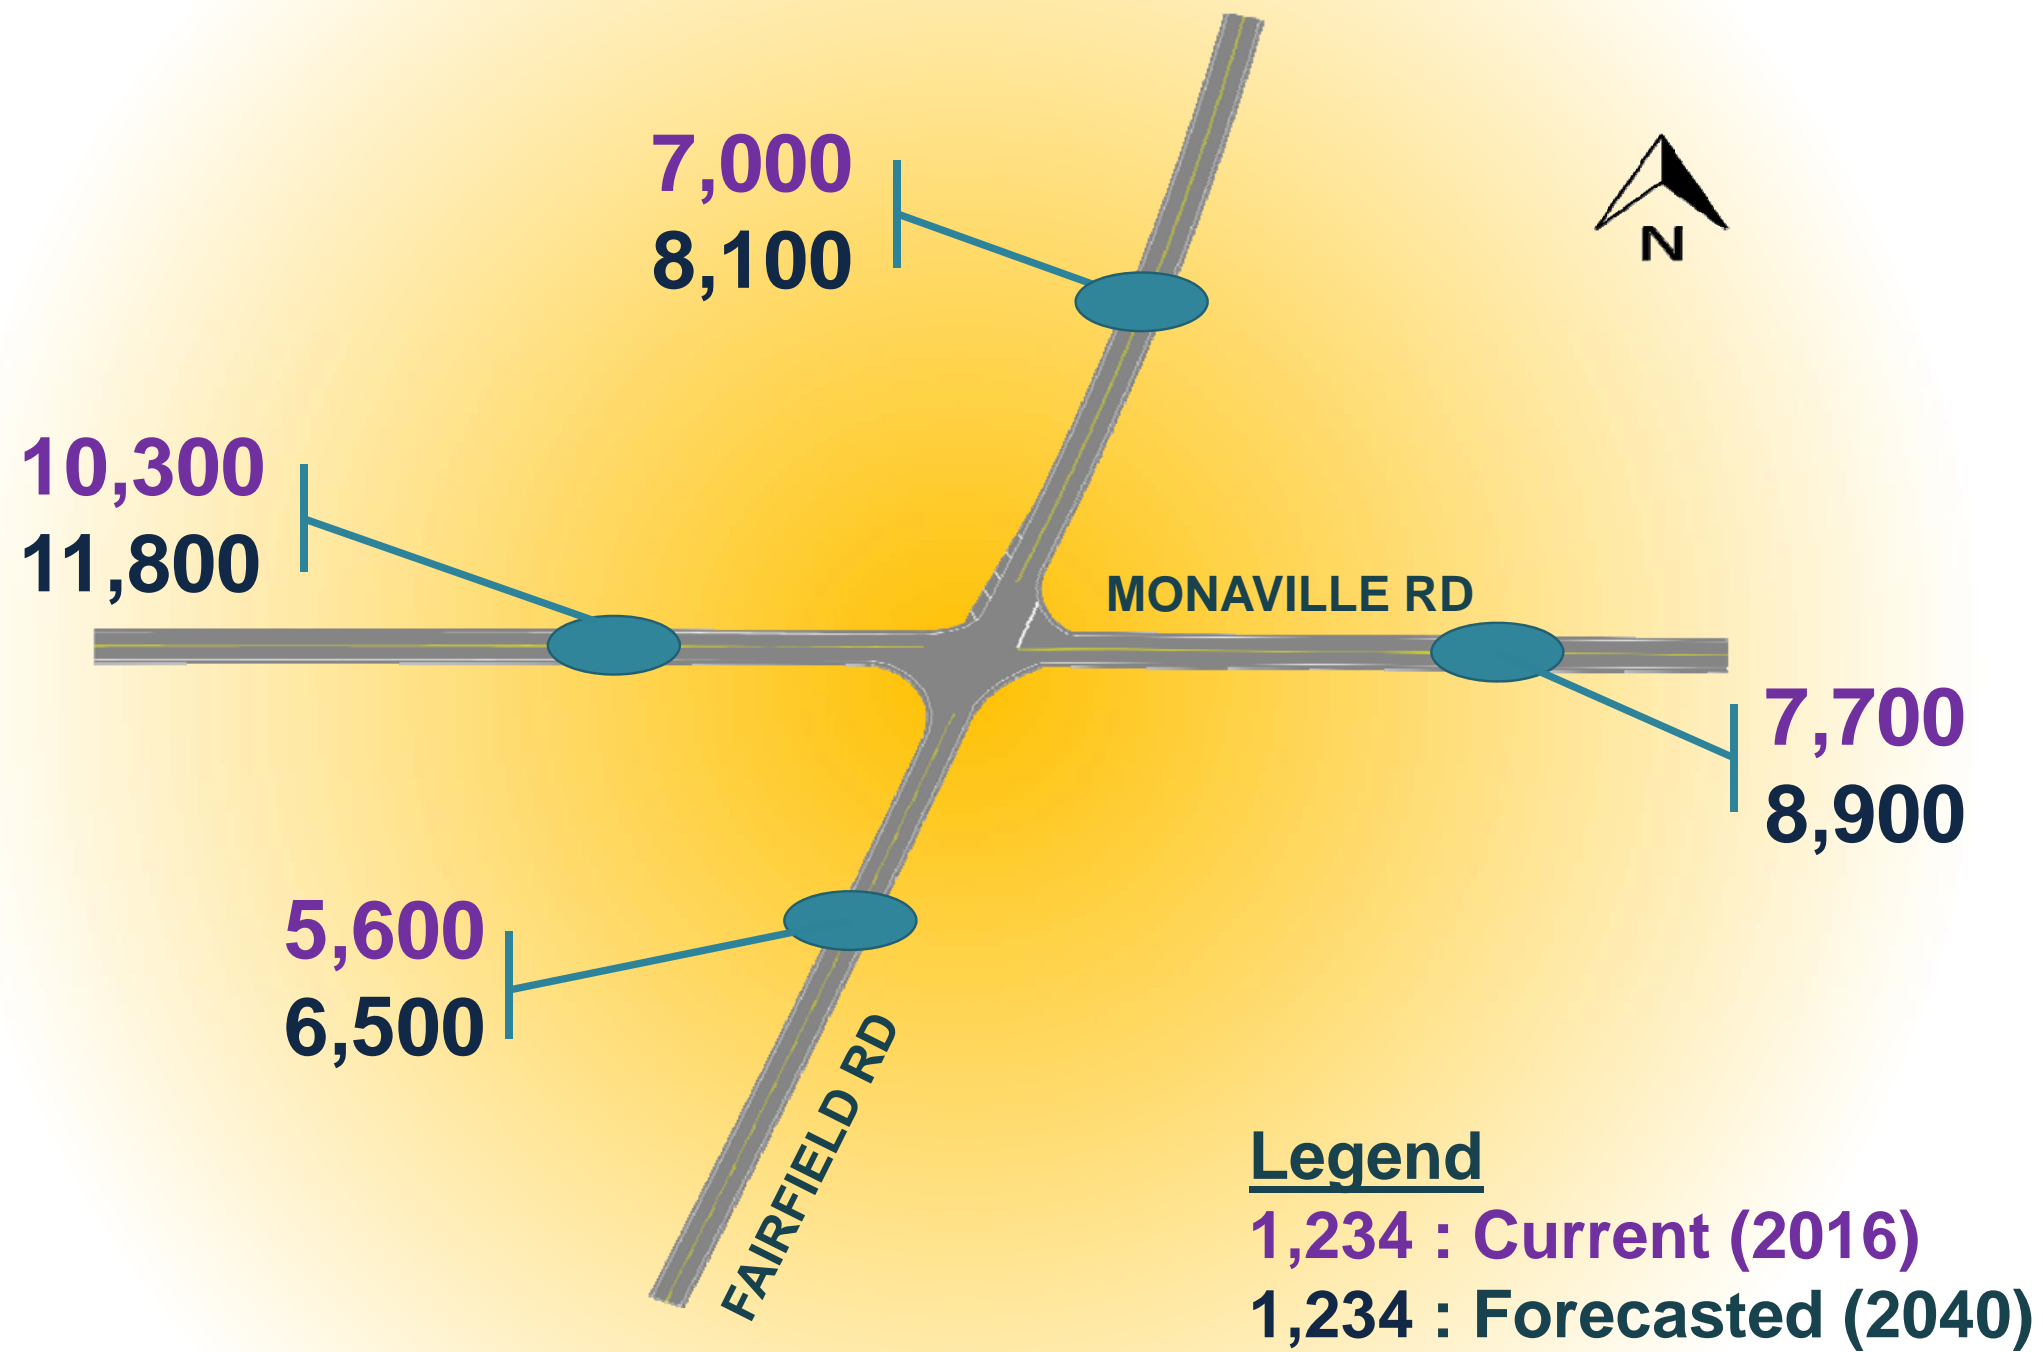

NOTE: Project limits shown are preliminary.

Existing Conditions and Surroundings

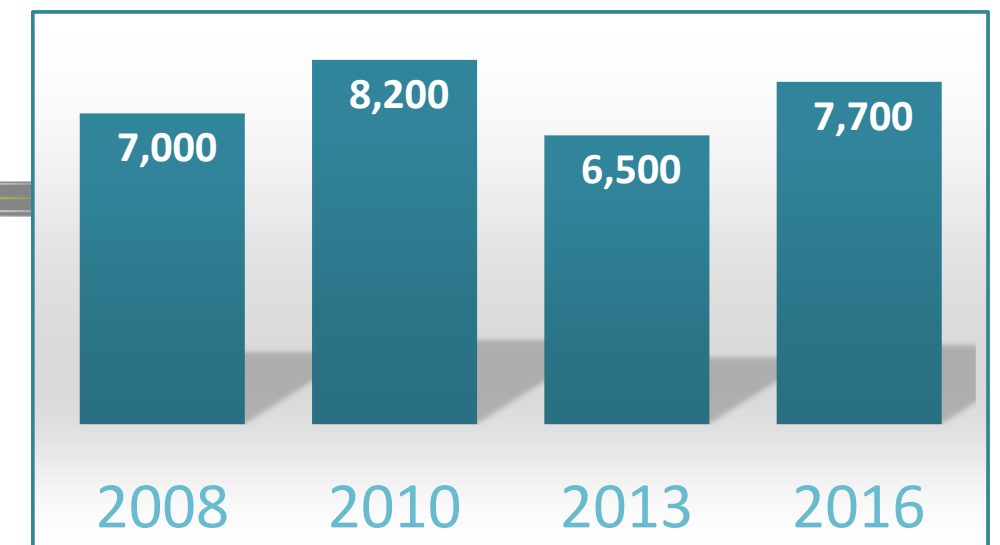

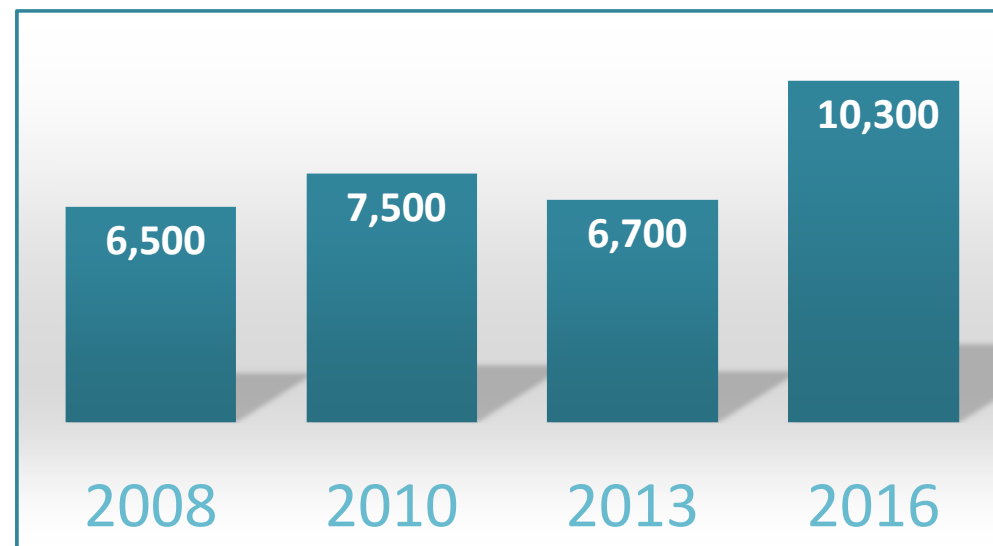

Average Daily Traffic

Note: Average Daily Traffic is the daily (24 hr) total of both directions.

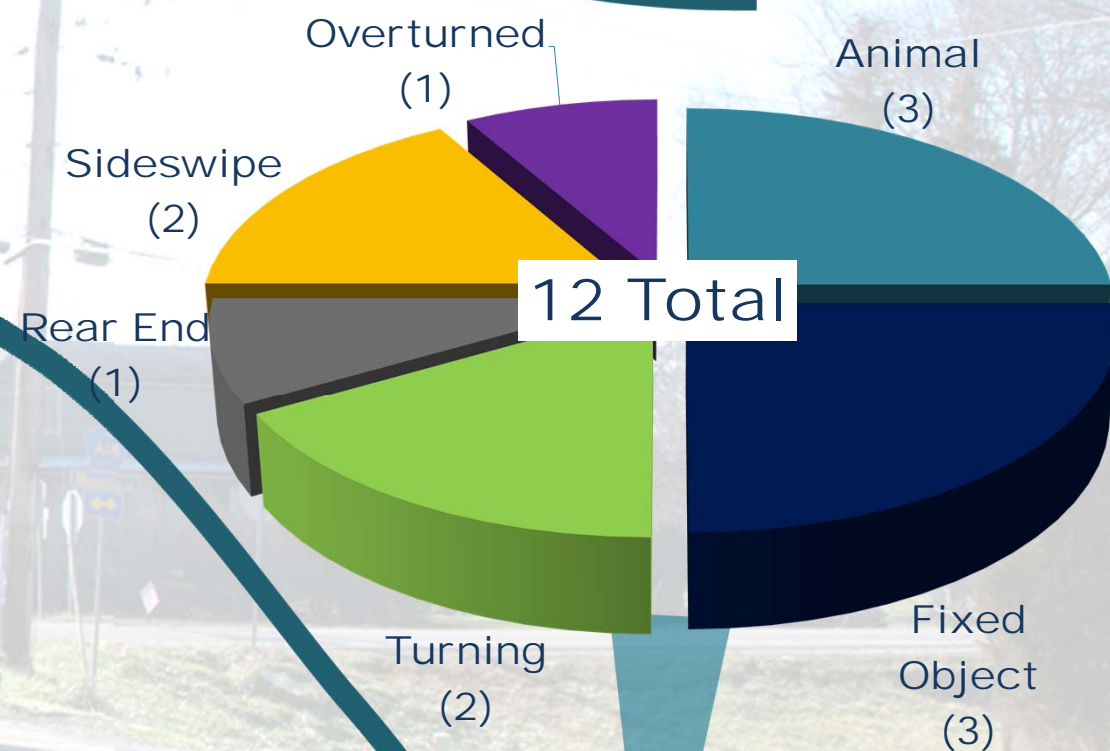

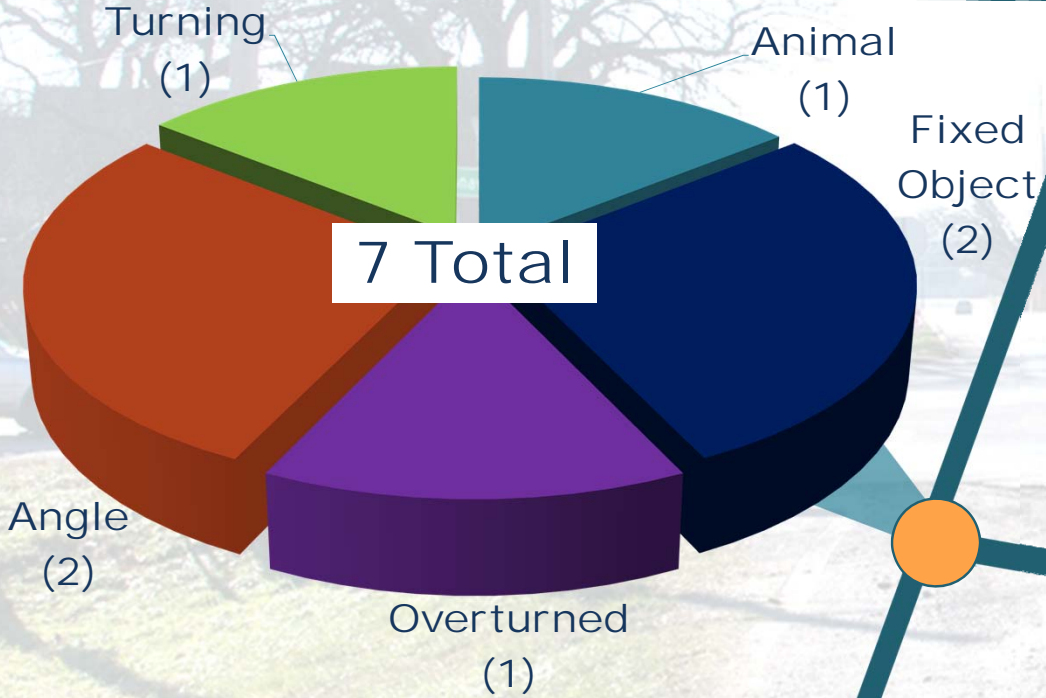

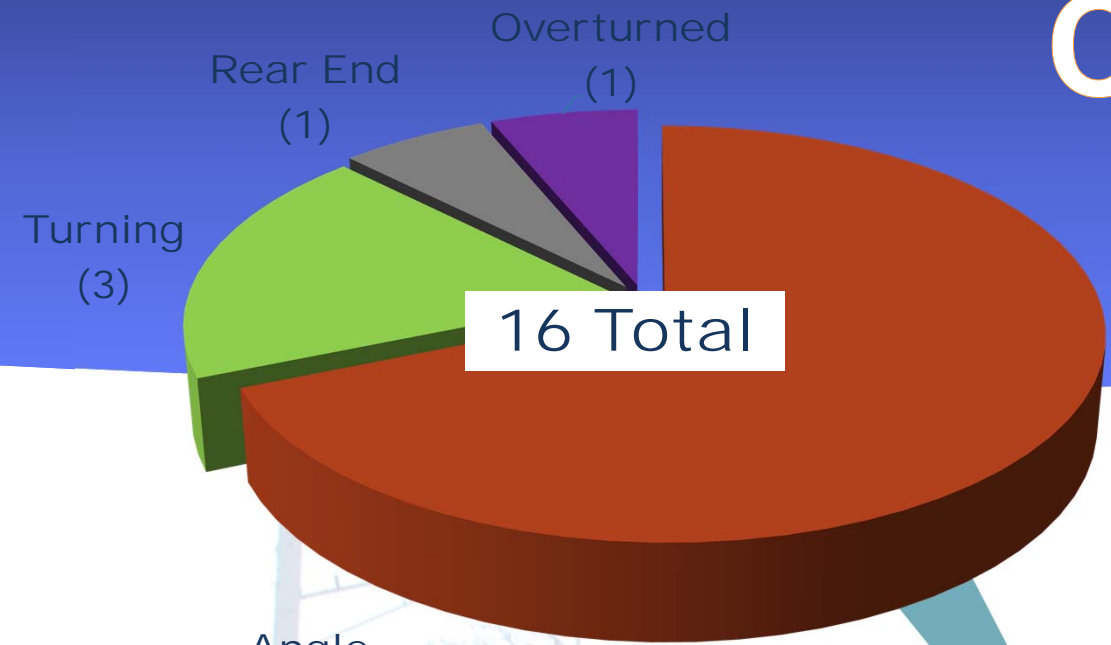

Average Daily Traffic

Grand Avenue closure:
How does it affect our traffic numbers and design?

Crash History

2006 through 2014

Crash Legend

- Animal
- Sideswipe
- Turning
- Rear End
- Angle
- Overturned
- Fixed Object

Group Discussion

What are the existing deficiencies?

Group Discussion

How can we improve safety and operations at the intersection?

Project Schedule

NOTE:

Project dates are dependent upon project readiness and the availability of funding
